Each course has 4 sections:

1. In the **SIMULATION** section are short grid tests, focused on practical aspects of the course, which can be repeated. After finishing the test and displaying the grade, the correct answers are also displayed. Students can thus check themselves and improve

their knowledge. The time required to solve a test is 10 minutes. The tests can be repeated in order to perfect the acquired knowledge.

2. In the **TESTS** section are grid tests with 10 questions each. The time required to solve a test is 20-30 min.
3. In the **APPLICATIONS** section are two practical tasks, for example completing the patient's file, preparing a report or questions focused on practical aspects of the course.
4. Students and the teacher can discuss in groups, on different topics in the **VIRTUAL TEACHER** section.
